Projects

Student Dashboard

Tools: HTML, CSS, JavaScript

an interactive dashboard for students to help them analyze their performance with productive tools.

challenges: i had some challenges with storing and showing data & some difficulties with making the site responsive but at the end i managed to solve these problems by time

link:
Github:

Find My Cash

Tools: react.js, tailwindCSS

a friendly cash tracker that will help you keep track with all your purchases.

challenges: it was my first react app so i had some difficulties with the react logic and states management but it got easier by time
